GRAIN GAUGE

**SPECIAL
INTRODUCTORY
OFFER**

£111

(ex. VAT)

Simple, dependable bin and silo level monitoring

Features and benefits:

- Easy installation
- Clear visibility
- Increases farm safety
- No electricity required
- Maintenance free
- Cost effective
- No more overfilling

Grain Gauge accurately monitors the levels of grain in bins and silos.

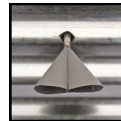

As the grain reaches the Grain Gauge level activator, it turns the colour from black to green - even glowing in the dark at night. When the bin is unloaded, the indicator returns to black.

Multiple monitors can be installed up the bin or silo wall at key levels.

Grain Gauge avoids the need to climb the bin, saving time and money to check levels and reducing the risk of accidents.
